

“Draw a neat and simple flowchart for ‘College Event – Participant Registration’ based on the given image. Include these steps: Start → Enter Participant Details → Enter Event Details → Enter Registration Details → Enter Event Date → Check Registration Status → Display Registration Status → End. Use standard flowchart symbols: oval for Start/End, parallelogram for input/output, rectangle for processes, diamond for decision, and arrows showing the correct flow. Make it clean, properly aligned, easy to understand, and suitable for a BCA college exam. Do not add unnecessary steps or decorations.”
